# RSS EduBlogs?

The screenshot shows the Google Reader web interface. At the top, there's a navigation bar with links to Gmail, Calendar, Documents, Photos, Reader, Web, and more. The user's email address, zaid.alsagoff@gmail.com, is displayed. Below the navigation bar, the Google Reader logo is on the left. The main content area is titled "Helge Scherlund's eLearning" and shows a list of subscriptions. A large, handwritten note in black and red text is overlaid on the right side of the interface, reading: "To Keep track of your favorite EduBlogs!". The note is written in a casual, hand-drawn style. The background of the note is white, and the text is black, with "favorite EduBlogs!" in red. The note is positioned over the "Expanded view" of a subscription, which is currently showing a list of items. The interface also includes a search bar, a "Feed settings..." dropdown, and buttons for "Mark all as read" and "Refresh".

## EduResources Weblog--Higher Education Resources Online

*This weblog focuses on locating, evaluating, discussing, and providing guidelines to instructional resources for faculty and students in higher education. The emphasis is on free, shared, HE resources. Related topics and news (about commercial resources, K-12 resources, T&D resources, educational technology, digital libraries, distance learning, open source software, metadata standards, cognitive mapping, etc.) will also be discussed--along with occasional excursions into more distant miscellaneous topics in science, computing, and education. The [EduResources Weblog](#) operates in conjunction with a broader weblog called [The Open Learner](#) about using open knowledge resources across a diversity of subjects, levels, and interests for a wide range of learners and learning communities--students in schools and colleges, home schoolers, hobbyists, vocational learners, retirees, and others.*

### Teachers' Domain

Teachers' Domain is a one-stop site for collected media resources from public television. Registration is required, but is free. The site is divided into Teachers' Domain for K-12 resources and Teachers' Domain College Edition for higher education resources. The materials in Teachers' Domain can be searched by keywords or browsed under broad subject areas. To switch from the K-12 to the College Edition click on the "Change Editions" link at the bottom the the search page. \_\_\_\_JH

"Teachers' Domain is an online library of more than 1,000 free media resources from the best in public television. These classroom resources, featuring media from NOVA, Frontline, Design Squad, American Experience, and other public broadcasting and content partners are easy to use and correlate to state and national standards.

Teachers' Domain resources include video and audio segments, Flash interactives, images, documents, lesson plans for teachers, and student-oriented activities. Once you register, you can personalize the site using 'My Folders' and 'My Groups' to save your favorite resources into a folder and share them with your colleagues or students.

Teachers' Domain strives to strengthen teacher knowledge by providing innovative teaching methods that incorporate technology in the classroom and inspire students to

## Clive on Learning

Clive Shepherd has spent the past 25 years working with computers trying to make learning things happen electronically. He's still trying to figure it out.

THURSDAY, SEPTEMBER 11, 2008

### ➤ What if learning technologists ruled the world?

This was the question that Professor Gilly Salmon asked at her presentation at ALT-C in Leeds yesterday. Now I'm a bit of a fan of Gilly's work as a pioneer in the field of collaborative online distance learning. She stands out as an academic who's able to communicate in simple terms to a wide audience, with the pragmatism and common sense that can only be acquired through practice. And she has a new book coming out soon on podcasting, although now I'm beginning to sound like a chat show host.

### About Me

**Name:**  
Clive Shepherd  
**Location:**  
Brighton, East  
Sussex, United Kingdom

I'm a consultant with an interest in all aspects of technology-assisted learning and communication.

[George Washington School of Business will record classes to replay online - Eric Thibault, GWHatchet](#)

Students enrolled in the Master of Science in Project Management program will soon be able to watch a professor's lecture without having to leave their homes or residence halls. University officials in the Graduate School of Business announced their plan last week to integrate a "TiVo" style system called "Lecture Capture" into their program in order to enhance the opportunities they can offer to students. Video cameras have been installed in classrooms and have started to record lectures. Officials in the School of Business estimated that students will be able to view lectures online by 2009.

[Pupils test multi-touch screens - BBC](#)

School pupils are trying out desks with interactive screens that can recognise more than one person's finger presses. Researchers at Durham University observed classroom interactions then worked with manufacturers to produce the necessary software and hardware. Their SynergyNet system has a teacher's console to monitor what each child or group of children is working on.

### ➔ Examples of eLearning 2.0 : eLearning Technology

During my presentation last Thursday that was an introduction to eLearning 2.0 as part of an online event for the eLearningGuild, I mentioned a few common ways that I've seen eLearning 2.0 approaches used in corporate learning settings:

- Alongside Formal Learning
  - Blog as writing tool
  - Wiki as a collaborative learning tool
- Editable reference materials (Wiki)
  - Internal / External Product information
  - Process information
  - Sales scenarios
  - Frequently Asked Questions (FAQ) / support information
  - Online reference / glossary
- Experience Capture
  - New-hire blog
  - Maintaining a "lab or project notebook"
- RSS Reader, Podcasts - Steady Drip

One of the top  
technologists in  
**e-Learning** and  
**Performance Support**.
